

**EVERSAFE
SECURITY
SOLUTIONS**

The First Line
of Defense

ADVANTAGES OF THERMAL TECHNOLOGY

Thermal cameras
measure temperatures
from a distance in
order to avoid
unnecessary physical
contact and maintain
the normal flow of
traffic

Efficient ::

Screen of up to 30
people at a time. Ideal
for schools,
universities, office
buildings, airports,
ticketed events, and
athletic facilities

**Eversafe's Mobile Thermographic Imaging
Pre-Screen Camera is a highly accurate,
contact-free, real-time alert system that
screens large groups of people for elevated
body temperatures.**

NON-INVASIVE TEMPERATURE SCREENING

One second to detect skin-
surface temperature of a
person

Simultaneous multi-person
detection

Non-contact measurement
to maintain social distancing
Immediately alarm to notify
operators

Designed for high traffic
areas

FEATURES & CAPABILITIES

Fully independent mobile
unit includes thermal
384x288 camera, monitor,
keyboard, and pre-
programmed CPU
Durable 84" overall height
aluminum and steel mobile
stand with floor anchor
points for secure long-term
use

Optional 2-Hour backup
battery for increased
mobility and data security
6-45 foot temperature
detection range
Accuracy is ± 0.5 degree
(0.9°F) to satisfy
preliminary screening
requirements
